

## Production Manager For Benedum-Trees Arrives To Look Over Guardian Well

W. J. Jones Says Guardian Oil Well Immediately Be Drilled To Greater Depth—Field To Be Thoroughly Tested—Representatives Of Pittsburgh Oil Interests To Arrive Shortly To Sign Agreement.

W. J. Jones, production manager for Benedum-Trees Oil Company of Pittsburgh, Pennsylvania, which company is taking over the Peace Coupee oil field, arrived in Grande Prairie by plane on Sunday.

Interviewed by The Tribune reporter, Mr. Jones said: "We plan to take the first well, now being drilled, deeper immediately in hopes of striking oil and a large flow of gas. The gas will be used for future development."

Mr. Jones further stated that it is the intention of the company to give the field a thorough test, which, of course, means the drilling of several wells. For the present the Guardian Oil well only will be drilled, for not until this is done it is possible to work out detail plans.

Mr. Jones further stated that J. E. Morrow and L. G. Huntley, who were here a few weeks ago, will arrive shortly to sign the agreement with the Guardian Oil Company.

"If the oil is there, we certainly will get it," remarked Mr. Jones, who is on his first visit to the Peace River. The production manager left for the well on Monday morning, accompanied by Robert Cochrane and Lee Alward.

## Bezanson Picnic To Be Held At Hall Wed., June 14th

Oldtimers and newcomers will again meet at the Bezanson Picnic, to be held on June 14, on the sports ground at the Community Hall.

There will be ball games and a full line of athletic events. Admission to the grounds is free.

As usual the picnic idea will be carried out and people are asked to bring their baskets. There will be lunch and refreshment booths on the grounds.

A dance will bring the day to a close.

A. Wales is president and N. McLaughlin is secretary of the Sports Association.

Three years ago the older men decided to drop out and give over to the younger men, and since then the young fellows have carried on most efficiently.

Everyone is asked to keep the date in mind and attend the East Enders big annual event.

## Large Crowd At Dawson Creek School Sports

Held Under Auspices Of Dawson Creek Branch Of Canadian Legion In Commemoration Of The Royal Visit To Canada.

DAWSON CREEK, May 29.—Canadian Legion School Sports in commemoration of Their Majesties' visit to Canada, held here last Saturday under the auspices of Dawson Creek Branch, were a huge success, there being 1,786 individual entries. The day was ideal, track in perfect condition and a large crowd of adults in attendance. Postponed from the previous Saturday because of rain, the delay proved to be all to the good.

The events were run off with true military precision and Dawson Creek Legion is to be congratulated on its splendid efforts to promote sports.

Highlights of Sports  
Jimmie Allen air races attracted much attention and there were some very fine flights.

Another highlight of the sports was an impromptu tug-of-war between twelve Legionnaires and twelve teachers at conclusion of sports. This created so much interest that it is now planned to make it an annual event.

Cup Winners

Senior Schools, J. Carlson Cup—Dawson Creek School.

Rural "A" Schools, Canon Proctor Cup—South Dawson.

Rural "B" Schools, J. Wilcox Cup—Pouce Coupe Central.

Jimmie Allen Air Race, Glen Braden Cup—Jim Linklater, Dawson Creek.

Tug-of-War, F. J. Orme Cup—Rolla School.

Boys' Open Relay, A. S. Towell Cup—Dawson Creek School.

Girls' Open Relay, Jack Quait Cup—Pouce Coupe School.

Girls' 100-Yard Dash, 15 years and under, A. Chalmers Cup—Edna Hodgson, Dawson Creek.

Boys' Open High Jump, J. Watt Cup—Dick Tanhuuser, Pouce Coupe.

Half Mile Boys' Open, W. A. Reasbeck Cup—Stan Vipont, Rolla School.

Girls' Open High Jump, Pouce Coupe Legion Cup—Hazel Fraser, Fort St. John.

Girls' Individual High Scorer Cup—Gwen Wilcox, Dawson Creek.

Second time she has won it.

Boys' Individual High Scorer Cup—Ray Rivelli.

Best Dressed School in Parade—Arras School.

Trip to Edmonton Won by:

Violet Hopkins, Arras School. Trip donated by J. Watt for girl under 11 to score highest points in Track Meet.

She had nine points.

Julia Wangler of Willow Valley School. Trip donated by Dawson Creek Legion.

Annie Livingstone, Progress School. Trip donated by West Harper.

Hazel Thompson of Sunnybrook School. Trip donated by N. W. Gilliland.

Gerry Hall of Rolla School. Trip donated by Dawson Creek Legion.

There were many other events, 104 medals and 66 merchandise prizes being awarded.

## Last Service Held In Christ Church Sunday Evening

Old Church To Be Replaced By Modern One—Costing Upwards Of \$5,000—Rev. T. D. Jones Refers To The Part The Church Played In Life Of The Community During Past 25 Years.

On Sunday evening the bell of Christ Church (Anglican) rang from the old church belfry for the last time, calling the congregation to the final evening service to be held in the old church, which was erected in 1914.

Again the old must make way for the new. Construction of a fine new edifice is to commence just as soon as the old building, associated with the life of the community so long, is moved.

The final service was most impressive. The rector, Rev. T. D. Jones, referred to the passing of the old building in which so many wonderful meetings and services had been held during the past 25 years.

While the congregation realized that a new church was necessary, the memories of the sweet past cast a deep gloom over those who loved the old church.

In referring to the several incumbents of the church, Mr. Jones stated that those living still take a deep interest in Christ Church; also, too, do the wives of those who have passed on.

The new church will be in the typical style of Anglican churches and will cost upwards of \$5,000. It will be 32 feet wide and 70 feet long and have a seating capacity of about two hundred. The lower part of the outside walls will be of fir and above that stucco with half timber effect. On the inside there will be a timbered effect on the ceiling, while the walls will be plastered.

The contractors for the old church were Shores and Ross. At that time the centre of the parish was at Lake Saskatoon. Services were held at Grande Prairie by Rev. F. Moxhey and Rev. Hugh Speke, who were stationed at the Lake.

When the old church was built Rev. Canon Smith, who did an immense amount of pioneer work, conducted a church on Richmond Hill. Canon Smith moved to England, where he died. His widow is still living.

The first rector of Christ Church was Rev. Mr. Abbott. Rev. Mr. McDonald and Rev. Mr. Wade followed.

Rev. Mr. Little, who was the next incumbent, is now Archdeacon of the Diocese of Athabasca, and lives at Athabasca.

Canon James, who followed, is now residing in England.

Rev. Mr. Jackson, who was the next rector, is living in Ceylon, connected with church work there.

Canon R. J. Pierce, who followed, is in charge of a church near Victoria, B. C.

At the time the church was built Bishop Robbins was head of the diocese. He was followed by Bishop Renison, who stayed only a short time. He is now at Toronto in charge of a big church. Bishop Sovereign, the present bishop, succeeded him.

Bishop Robbins is assistant Bishop of Norwich, England.

Rev. Hugh Speke was killed overseas, and his widow, who is still living in England, erected the Speke Hall in his memory.

The old church has been purchased by Frank Donald, who will convert it into a two-flat apartment building. The parish of Christ Church is the only self-supporting one in the diocese of Athabasca.

And thus passes the old church, with its pleasant memories, to give place to a more modern building.

## Farmers Donating Grain Liberally To M.P.H. Association

Farmers are reminded that the Monkmann Pass Highway Association are still taking donations of grain. Those willing to donate an acre or more are asked to send in their names to the works superintendent, Albert Smith, Wembley.

Mr. Smith, who was in Grande Prairie on Monday, informed The Tribune that the association was getting splendid responses from the farmers in the entire Peace River country, including the Block.

He further stated that the volunteer crew will be working on the road to the pass some time next week. Another team and a few supplies are necessary, Mr. Smith added.

## Rio Grande Sports On Wed., June 21

RIO GRANDE, May 22.—The Rio Grande Sports and Stampede will be held on Wednesday, June 21. The program will include, besides the rodeo, baseball, ladies' softball, ladies' basketball. There will be a show and dance in the evening.

The sports association asks everyone to make a point of spending the day at the beautiful sports grounds on the Red Willow River. There will be no dull moments and everyone is assured of a good time.

## PRICES FOR HOGS ADVANCE

Prices for hogs took a brace and \$7.10 was paid at Grande Prairie for hogs on Saturday, as against \$6.75 two weeks previous. There were three cars of live stock shipped from this point, two and a half of hogs and the balance in cattle. Prices at Edmonton for cattle were firm.

## THE NEW HOTEL VANCOUVER

Finest in the British Empire, the new Hotel Vancouver, a \$12,000,000 hostelry, jointly owned by the Canadian National and Canadian Pacific Railways, was officially opened last Thursday (May 25). Its interior decoration, in the best modern manner, marks an entirely new departure in hotel practice. There are 600 guest-rooms, and its public spaces are sufficiently large to take care of future additions in the form of two wings which, if required, will add 400 rooms. During the Royal Visit the hotel was crowded and reservations are heavy, too, for the period around July 1. Much custom is expected in the early months of its career from people making the trip to Vancouver just to enjoy its elegant hospitality. S. J. Hungerford, president of the Canadian National, and D. C. Coleman, vice-president of the Canadian Pacific, officiated at the opening ceremonies. Lieut.-Governor Humber declared the hotel officially open.

## E. L. Gray, Liberal Provincial Leader, to Hold Three Meetings In The Peace River Country

### Wembley Pioneer Celebrates His 93rd Birthday

WEMBLEY, May 29.—A very special birthday party was celebrated on May 17. Those present were: Joseph Bateman (guest of honor), Mr. and Mrs. D. W. Chambers, Mr. and Mrs. Geo. Shields and family, Mrs. Tyrrell, Mr. and Mrs. Noel McLean and family, and Wm. Cotton.

Mr. Bateman was born in England May 1846. He came to Canada in 1860 and took part in the Northwest Rebellion in 1885. A carpenter by trade, he followed this occupation in Ontario and Calgary. From Calgary he came to the Peace River in March, 1912.

Mr. Bateman has been an Orangeman for over 50 years. He has been a subscriber to the Sentinel for the same length of time. He still enjoys reading his paper.

The party was held on the 17th, being the Wednesday half-holiday, for convenience.

We wish our friend many more years of health and activity he now enjoys.

Mr. and Mrs. Ted Chambers took advantage of the occasion to have John and Dale christened by Rev. Geo. A. Shields.

### TWO EAST END YOUNG MEN LEAVE FOR FT. NELSON DIST.

Fred Mabbutt and "Bud" Gallant of the East End left on Saturday by truck for Fort St. John, where they will outfit and proceed to the area north of Fort Nelson, where they intend to stay for some time prospecting and trapping. Both are experienced in prospecting and trapping and the northern wilds have no terrors for them. They took along four horses for packing purposes.

They were driven to Fort St. John in Ernie Ford's truck.

### BARN DESTROYED BY FIRE

Early Friday morning, May 26, the Grande Prairie fire brigade was called to a fire that completely destroyed a barn belonging to Frank Rudge on the north outskirts of town.

All articles in the barn were burned, including two sets of harness. No animals were lost.

Cause of the fire is unknown.

C. R. Bell, who is convalescent from a long illness, left by car on Monday for points on the outside.

### C. C. F. Meeting At Teepee School On Thurs., June 8th

A meeting in the interests of the C.C.F. will be held in Teepee Creek school on Thursday, June 8, at 8 p.m. The former local at Teepee Creek was revived, with Geo. McCauley president and Donald Fraser secretary.

There is considerable interest being taken in the campaign started by the Beaver Lodge U.F.A. for the setting up of a T.B. free area in the Peace River and cattle owners are quite keen to get information on it.

Similar meetings to the ones reported above will be held at the Albright Community Hall on Saturday, June 3, at 8 p.m., and at Twilight School on Friday, June 9, and East Kleskun School, Wednesday, June 7.

### C.N.R. SWITCHMAN KILLED

EDMONTON, May 31.—John Maddess, 50, C.N.R. switchman, was run over and killed by a freight car on a main track about 300 yards west of the old C.N.R. station today.

Mr. Maddess was on duty when the accident occurred.

He was a very good neighbor. He dearly loved his children and to his wife he was a kind and considerate husband.

Last Thursday afternoon Bentum United Church here was filled to overflowing with friends, both old-time and new, who came from far and near to pay their last respects to the deceased. Simple but impressive services were conducted by the Rev. Geo. A. Shields, who spoke words of comfort to the bereaved. Hymns sung were "Rock of Ages," "Nearer My God To Thee" and "Jesus Saviour Pilot Me."

Interment was later made at the Lower Beaver Lodge cemetery and the following acted as pallbearers: M. Miller, Howard Halliday, Russell Walker and George Stone.

There were many beautiful floral tributes.

Funeral arrangements were in the hands of J. B. Oliver, Grande Prairie.

To his sorrowing wife and children we extend the districts sincere sympathy.

## Farmers Interested In Co-operation

SEXSMITH, May 29.—Apparently the decision of the United Farmers of Alberta to leave the field of politics and to concentrate entirely on the educational and economic efforts of the organization to better the position of agriculture in this province, meets with the approval of the farmers generally.

The central office of the U.F.A. in Calgary reports that so far this year the membership has approximately doubled that of a year ago and the business done by the Co-operative shows a large increase also over the same months of 1938.

In the Grande Prairie district the trend is in the same encouraging direction. There is a demand for speakers to address meetings of locals already in existence and from localities where no organization has previously been attempted.

Hard times always quickens the interest in lower prices for farm necessities and it is the cooperative purchasing end that most farmers want information on.

Last week W. R. Roberts, manager of the Co-op. Shipping Association, along with Mr. Clarke, in charge of the Maple Leaf-U.F.A. Oil agency at Grande Prairie, and H. W. Allen, U.F.A. director for Peace River, attended meetings at Teepee Creek and Bad Heart for organization purposes.

The former local at Teepee Creek was revived, with Geo. McCauley president and Donald Fraser secretary.

There is considerable interest being taken in the campaign started by the Beaver Lodge U.F.A. for the setting up of a T.B. free area in the Peace River and cattle owners are quite keen to get information on it.

Similar meetings to the ones reported above will be held at the Albright Community Hall on Saturday, June 3, at 8 p.m., and at Twilight School on Friday, June 9, and East Kleskun School, Wednesday, June 7.

### BEAVER LODGE, MAY 29.—Another of the early pioneers of the Lower Beaver Lodge Valley passed away at the Grande Prairie Municipal Hospital Monday, May 22, in the person of Simons M. Dale.

Better known to us all as "Jim," he came to this country from the States some thirty years ago, with little capital other than his ambition and rugged determination to find a home in this great northland. That he succeeded is amply demonstrated in the fine farm home he finally built up and the well-tilled fields he cultivated that always were so productive.

In the early days he ran one of the first sawmills and converted into lumber a large number of the jack-pine logs that once stood on the Dry Ridge (now known as Aspen Dale).

A lake near the old sawmill site is known as Bauman Lake. "Jim" also for many years ran the old Lower Beaver Lodge steam threshing outfit, a portable affair which used to be pulled from job to job by oxen.

"Jim's" personality was a most colorful one, but beneath his rough exterior there beat a heart that was kind and big, and many found him to be a very good neighbor.

He dearly loved his children and to his wife he was a kind and considerate husband.

Last Thursday afternoon Bentum United Church here was filled to overflowing with friends, both old-time and new, who came from far and near to pay their last respects to the deceased. Simple but impressive services were conducted by the Rev. Geo. A. Shields, who spoke words of comfort to the bereaved. Hymns sung were "Rock of Ages," "Nearer My God To Thee" and "Jesus Saviour Pilot Me."

Interment was later made at the Lower Beaver Lodge cemetery and the following acted as pallbearers: M. Miller, Howard Halliday, Russell Walker and George Stone.

There were many beautiful floral tributes.

Funeral arrangements were in the hands of J. B. Oliver, Grande Prairie.

To his sorrowing wife and children we extend the districts sincere sympathy.

### Over 400 Happy Boys and Girls From North Country Will See King and Queen

Friday, June 2, will be a red letter day for some 25,000 boys and girls who will have the opportunity to see the King and Queen at Edmonton. Of that number 450 will be from the Peace River. It is estimated that there will be 200 from the Grande Prairie school, inspectorate and 50 from the Block.

Visualize the scene on the train on Thursday, especially when it connects at McLennan with the train from north side of the Peace with at least 150 boys and girls aboard. Other children will be picked up along the line from McLennan to Edmonton, and it is expected that there will be aboard about 450 boys and girls from the Peace River country when Peace River's special train for the Royal Visit pulls into the Capital City. During the first part of the journey the children will be in high glee and there will be plenty of noise and excitement. Those chaperoning this army of youths undoubtedly will have their hands full with plenty to do. However, as the train speeds on and night begins to fall, the "sand man" will get busy and the noise will gradually lessen and the young folks curl up and just naturally fade away into sleep.

Possibly many of these youngsters have never been on a train before, may never have seen a city. For these children there will be another big surprise when they step off the train and make their way downtown. Here they will see street cars for the first time. Later they will take their places in the stands allotted to youth from the Peace River.

Finally the big moment of their lives arrives: the King and Queen are now opposite, followed by miles of marching troops and others. As their Majesties pass by, these children will join in the singing.

Later the Peace River children will entrain for home. There will not be as much noise on the train as when they started. They will arrive home next day, tired but happy in the knowledge that they have seen the King and Queen, who unite in a strong, free comradeship the British commonwealth of nations.

## Seventeen Records Smashed At School Meet On Saturday

### Bob Light Of Hythe and Ruth Swanson Of Five Mile School Are Outstanding Athletes

There Were 911 Entries—Prizes Well Distributed Amongst Various Districts—Boys and Girls Had Splendid Discipline And Took Their Defeats And Bumps Without Murmur—All Events Well Contested—Presentation Of Trophies Colorful Part Of Program—Big Event Run Off With Clocklike Precision.

Seventeen records were smashed at the Grande Prairie Inspectorate School Track and Field Meet, held in Grande Prairie last Saturday.

There were 911 entries, which is quite remarkable when it is considered that elimination contests were held previously in the various districts.

Parents and many others from the districts accompanied the boys and girls. Keen interest was taken by the town people, the majority spending at least an hour or so during the meet.

The prizes were well distributed amongst the various districts.

Bob Light of Hythe, competing in Class C, Bob, who is not yet fourteen years of age, annexed no less than six trophies, breaking records in each event. The boy, who is very tall for his age, anticipating that his age might be questioned, took the precaution to have his birth certificate with him.

Ruth Swanson of Five Mile School, east of Grande Prairie, turned in the outstanding performance for the girls' division. Competing in Class A, she won four trophies. This young lady demonstrated that she has speed to burn.

One of the highlights of the Meet was the half mile race, in which Ben and Hyson Wyman and Jack Edwards starred. All three ran a splendid race. Edwards took up second position, and trailed his competitors all the way until the tape, when he put on the power and won by a close margin. He negotiated the distance in 2 minutes and 31 seconds, hanging up a record. Ben Wyman, who was right on Edwards' heels, also is credited with breaking the record. Four entered in this race, but the other entry retired after the first lap.

In all Edwards won four trophies. Herman Treile handled the starting gun for the foot races.

The prizes were pretty well distributed throughout the inspectorate. Grande Prairie High School won the girls' basketball tournament and Grande Prairie High School also emerged victorious in the boys' basketball.

Hythe won the open softball. All events were well contested and the Meet will go down in history as the best yet held in the Grande Prairie School Inspectorate.

The refreshment booth run by the organization proved very popular.

### COMPLETE RESULTS

The following are the complete results of the meet:

(Continued on Page Seven)

Neatly dressed young ladies gave service de luxe with a smile.

The splendidly organized way in which the meet was conducted was the subject of compliment on all sides. There were no aggravating delays. Each class followed the committee in charge with army precision. There were no admiring glances all through, both on the part of the teachers and the boys and girls.

Further indicating their training and discipline, the boys and girls took their bumps and never once murmured a protest against any decision. Such training fits the rising generation to take their place in life and accept their defeats and victories with the same administrative spirit they are showing on the athletic field.

Following the track events the winners were presented with their trophies, each boy and girl getting a great hand as they left the platform. The presentations were made by B. T. Ryker, chairman of the Grande Prairie School Division, No. 14, who was assisted by Inspector L. A. Walker and "Mel" Fowler.

G. Freesbury of Montrose Public School, was master of ceremonies. Mr. Walker said that the Meet was made possible by the administrative end of the school organizations. He pointed out that the success of the Meet was the culmination of many weeks of hard work on the part of those in charge of organization.

Mr. Nepsad of Hythe outlined the plan for taking the children to Edmonton to see the King and Queen. Following the presentation the basketball and softball tournaments were staged, which ran well into the evening.

The following are the complete results of the meet:

(Continued on Page Seven)

## Oldtimers Of Old Waterhole District Pay G. P. Visit

Mrs. J. R. Dawson and son Charles, Mrs. W. C. Chalmers and Nic Pusynsky of the old Waterhole district on the north side of the Peace were visitors in Grande Prairie on Tuesday, guests of the Donald Hotel.

Mrs. Dawson and Mrs. Chalmers are two of the oldest white women on the north side of the Peace.

Mrs. Dawson, who was born in St. Catherine, Ontario, came to the Waterhole district in 1910. Mrs. Chalmers, who was born in Winnipeg, and Mr. Pusynsky, who was also born there, came to the Waterhole district in 1910. They made the trip into the country by way of Slave Lake.

In conversation with The Tribune reporter the oldtimers spoke of the happy days experienced when they travelled by oxen and team made it a point to camp at the waterhole.

The visitors are boosters for the town of Fairview, which became the trading centre in the area after the railway was constructed.

However, memories of old Waterhole days still linger in the minds of these oldtimers.

They stated that the north side had enjoyed plenty of rain and the crops were coming along fine.

The visitors left for home Wednesday morning.

## Ovette, Magician, Put On Clever Show In Old Capitol

The show staged by Ovette the Magician packed the Old Capitol Theatre on Friday night. He is undoubtedly the cleverest man in his line that has ever toured the Peace River.

The various turns included card tricks, producing doves and rabbits from nowhere, getting out of ropes tied by someone from the audience.

By way of variety, Ovette put on several comedy turns which were much appreciated.

Briefly the magician put on a real evening's entertainment which is worth anyone's time to see.

The shows are being sponsored by the Monkmann Pass Highway Association, which organization shares in receipts on a percentage basis.

Ovette will give another show at the Old Capitol Theatre on Friday, June 9.

## Ukrainian Priest At Rycroft Robbed By Two Young Men

## Department of Agriculture Notes

### 1939 Hog Gradings

An analysis of hog gradings for the first eighteen weeks of 1939 indicates a downward trend in the number graded to date this year as compared with the same period in 1938. The percentage of hogs grading "Select" has, however, increased by 6.3 per cent for the first 18 weeks of this year. 268,470 hogs were graded in Alberta in the first 18 weeks of 1939, as compared with 300,078 in the same period last year.

Hog gradings in Ontario show a similar decline, 513,912 being the figure for 1938 and 461,986 being graded in 1939, during the first 18 weeks.

Alberta is slightly in the lead in so far as the percentage of "Selects" graded is concerned—36.5 per cent of the hogs graded this year were marked "Selects." In Ontario the figure was 36.1, and in Saskatchewan 28.8. The importance of a high percentage of "Select" hogs is recognized by all concerned with the swine industry, inasmuch as this grade secures a preference on the British market.

**Experimental Union: Olds School of Agriculture**  
Over 700 parcels containing premiums of nursery stock or seed were distributed by the Olds School of Agriculture to members of the Experimental Union this spring.

Starting over 20 years ago, the Experimental Union, composed of the ex-students of the Olds School of Agriculture, has been instrumental in distributing small samples of approved varieties of cereals, grasses, clovers, potatoes, etc., among its members.

In recent years roots and seeds of hardy perennials and ornamentals have been added to the premium list. From this stock the members of the Union propagate seed for their own use. They are required to submit a brief report, which is used to determine the suitability of the various species for Alberta conditions.

The Experimental Union, through its membership, is doing a great deal to improve life in rural districts.

### More and Better Hay

The amount of hay that one can get from a piece of land depends on quite a number of factors: the stand, the amount of moisture, the fertility of the soil, the length of time the land has been cropped since it was seeded and the kinds of grasses and clovers that go to make up the crop. As a rule, a meadow should only be expected to produce a crop for three or four years before being broken up and the land again seeded to grain.

For general farm purposes, grasses should always be sown with a legume in making up a mixture for a hay crop. A mixture yields more

per acre and has a higher feeding value per ton. The grasses that one selects will depend on the district where the crop is to be grown. In the drier parts of the province either crested wheat grass or awnless bromus would be chosen, while in the regions of heavier rainfall timothy would probably be used.

Among the legumes, alfalfa stands out as being adapted to a wider range of conditions than any of the others. It not only grows on a great variety of soils but it also yields a hay of superior quality and in larger volume than any of the others. What alfalfa will do in increasing the yield per acre when mixed with grasses is shown very well by results that it has given at the Olds School of Agriculture over a period of years.

In the spring of 1931 several plots were seeded to different mixtures for hay. The yields have been taken each year since, so that now the average for seven crops is available and they are as follows:

Mixture Seeded:	Aver. Yield for 7 Years (1932-38)
Timothy, Western Rye and Alsike	1.71 tons
Timothy, Western Rye and Sweet Clover	2.06 tons
Timothy, Western Rye and Alfalfa	4.01 tons
Sweet Clover and Alfalfa	4.73 tons

These figures speak for themselves. The yields show a marked increase when alfalfa was included in the mixture. In plot one the alfalfa practically all died after the first crop had been taken, so that for seven years the timothy and western rye produced a crop. In plots two and four the sweet clover, being a biennial, died after the crop of 1932 had been harvested. Where alfalfa was sown, two cuttings were made each year, whereas the grasses yielded only one cutting. The extra alfalfa has a much higher feeding value per ton than the hay composed wholly of grass.

### ASPARAGUS

(Experimental Farms News)

Every permanent fruit or vegetable garden should have an asparagus bed. It supplies the family with spring's first cultivated vegetable, states James Gallaher, Head Gardener, Experimental Station, Kentville, N.S.

The soil should be comparatively deep, friable, well-drained and fertile, with plenty of organic matter and an abundance of soil nutrients. A good coat of barnyard manure deeply dug in the autumn previous to planting, and a spring application of a 5-10-5 fertilizer at the rate of five pounds per square rod, dug into the soil when it is being worked up for plants of Mary Washington are

recommended. These may be grown from seed a year before, or purchased as roots. If two or more rows are planted they should be six feet apart. A trench eight inches deep by two feet wide is dug out, levelled at the bottom, the roots of the plants spread out flat on the bottom of the trench one and one-half feet apart, covered with about two inches of soil and tramped firmly. Do not fill in the trench. Hoe frequently to control weeds and moisture. The roots of the asparagus work toward the surface and the trench is gradually filled in over a period of twenty to thirty years, the lifetime of the bed. Do not cut any of the tips the year after planting and but few the second year, and never too many thereafter. Some must be left to develop the roots for the following years' crop.

In the late autumn after planting the stalks are cut off close to the ground and taken away and burned. The bed is then heavily manured (three to four inches) with well-composted manure, which is covered with one inch of soil. In the years that follow all the stalks that produce seed should be removed (or the seed bed) to prevent them from falling to the ground and reseeding the bed. The bed is cleaned up annually late in the autumn and the stalks burned to destroy insects and diseases that they might harbor.

### RHUBARS

(Experimental Farms News)

No fruit or vegetable garden is complete without from six to twelve roots, according to the size and needs of the family, of either Ruby or Macdonald rhubarb, states James Gallaher, Head Gardener, Experimental Station, Kentville, N.S.

Rhubarb thrives best on a comparatively rich, deep, well-drained soil. The soil selected should be previously prepared by spading in deeply and thoroughly a good application of stable manure. Where space will permit it may be plowed under. Early the following spring the soil should be well worked up and a commercial fertilizer, preferably 5-10-5, applied at the rate of five pounds per square rod and well mixed with the soil prior to planting.

When resetting crowns taken from old dug-up clumps, single crowns should be selected, removing all old roots. These are set three feet apart in rows five feet apart. Plant the crown so that its growing tip is just below the surface of the soil and tramp the soil firmly. Hoe, dig or cultivate at intervals to loosen the soil and control weeds. The autumn remove this in spring and continue to dig and cultivate. Strong rapid growth of the leaves is the objective. The leaves manufacture the nutrients that develop the roots, in which are stored the reserves of food that make for the rapid growth of the stalks that we use as food. In the early spring. Remove no stalks the first year, but few the second, and after that never more than half the stalks that develop. The result will then be larger long, tender stalks for the table. It takes three or four years to develop a really productive crown.

Every farmer or gardener who has a good house cellar should grow his own winter rhubarb. Four to six crowns should be planted annually and from the fifth year on this number can be dug up annually for winter use. In a way continuous production for both summer and winter use is possible. The roots to be used for winter forcing are dug just prior to the freezing of the ground. After digging they should be placed on boards out of the sun, and left exposed till January 15. Then two of these roots may be brought into a warm dark cellar at bi-weekly intervals, put into a box, packed about with soil and peat moss and well watered when brought in and frequently afterwards. A month is required for forcing. Six wintered roots should give a continuous supply of winter rhubarb for two months.

### Who's Mad Now?

A Chinese, said by his doctor to be insane, was being questioned by a specialist. "Do you ever have any illusions?" asked the medic. "What are they?" asked the Chinese through an interpreter. "Why," explained the doctor, "do you ever hear voices, instances?" "Oh yes" was the reply. "When?" "Whenever someone talks to me."

## The SNAPSHOT GUILD

### SPRING BLOSSOMS

Blossoms add a charming seasonal quality to your springtime snapshots. Make a collection of such snaps this year—they're welcome in any album.

ANOTHER winter has passed into history, and spring is coming in. Soon many trees will be masses of blossom, early flowers will appear—and we will face picture opportunities that occur at no other season.

Any camera can be used for taking pictures of springtime blossoms. Usually, the best blossom pictures are close-ups, and we should always avoid the temptation to include too much. A single graceful branch generally makes a better picture than a whole orchard.

For these close-ups, a portrait attachment will be needed if you use a box or fixed-focus folding camera. Such an attachment is also helpful with focusing cameras. Another useful device is a short tape measure, since in a close-up the distance from camera to subject must be correct. A pocket range finder is even more convenient for measuring distances. Lighting is important. Straight overhead sunlight should be avoided.

Rather, light should come from the side, or somewhat from behind the blossoms, so that their form and translucency are emphasized. For this reason, the best time for taking blossom pictures are rather early morning or late afternoon. A slightly hazy day, with soft diffused sunlight, is ideal for making these blossom studies.

Any good "chrome" or "pan" film is suitable. For pictures that are to be enlarged, a fine-grained film is best. With "chrome" or "pan" film, satisfactory pictures can often be made without color filters, although a yellow filter such as the K-1 or K-2 may be used for even more truthful tone values and for darkening the sky behind white blossoms.

Blossoms make beautiful spring-like settings for informal portraits of friends, or family and children. Collect as many of these pictures as you can this season, for they are always a welcome touch in any album.

John van Guilder

## Timely Hints From the Beaverlodge Sub-Station

By W. D. Albright

"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

Another million dollar rain!

It is always too soon to despair.

There is an increased interest in pigs this spring but not many pigs to be interested in.

With the papers full of the Royal Visit there will be scant space this week for Timely Hints.

Farming is one of the most difficult of all businesses to manage by long distance control.

Morden, Manitoba, reports considerable blossom injury by a six-degree frost on the morning of May 11.

Habitually using up all spare cash and feed keeps individuals or communities continually "on the rocks."

In last week's signed article on bovine tuberculosis it was stated that the percentage of tuberculous hogs slaughtered in the autumn of 1938 was nearly six times as great as the percentage of tuberculous cattle. The Dominion Veterinary Director General explains that a considerable number of cases of tuberculosis are infected with avian tuberculosis.

Many a rhubarb plantation suffers from too close cropping. Dr. C. F. Patterson of the University of Saskatchewan, in a new bulletin on vegetables, says that during the first and second years after planting no pulling should be permitted. At no time should pulling be heavy and under most conditions it should cease early in August.

More than a hundred voluntary soil conservation associations have been formed in the five states of the Upper Mississippi Valley region to promote erosion control practices and to provide farmers with a working organization. Considerable expense is involved when one man undertakes to control erosion by himself. Cooperation cuts costs, secures technical assistance on advantageous terms and enlarges the benefits.

If the tent caterpillar appears, cut off and destroy by mashing with the boot sole the occasional nests found on ornamental or fruit trees. Burning seems a cruel death for anything. The writer never sees a nest burned without wondering how the perpetrator would like to be burned himself. Destroy the nests when the worms are at home. If the nests are too numerous for this or the specimens too valuable to permit mutilation spray with calcium arsenate or lead arsenate.

Two big paulownias of tempting Opatka plums are depicted in a 1938 snapshot sent us by Bert Mackey of Teesee Creek, Alberta, who thinks they yielded about 20 pounds to the bush and would have done a good deal better had the bushes been weighted down in the autumn of 1937. He finds they generally winter-kill badly above the snow line, though this last winter seems to have been an exception for the eight-year-old bushes are now green to the tips. They have at times been set back by rabbits and mice, which seem fond of plum bark dessert.

Apply Now for Potato Inspection  
Potato growers who have planted certified stock and wish to have the growing crop field inspected with a

Prairie the second rain alone amounted to about two and a half inches, while some districts eastward appear to have had even more. While the cutworms are by no means all dead and are capable of much further havoc, their activities were largely suspended by the rain, and meanwhile the crop grows rapidly ahead.

### Grasshopper Control

What is the best time to spread grasshopper poison? If I remember right Paris green was used in Manitoba. Hoppers are on the golf course here also a quarter just south of my place, and now I have them fairly thick around my gardens. — G. Y. Peace River, Alta.

Ans.: J. L. Keins, stationed at Grande Prairie, Alberta, has charge this season of the Alberta Department of Agriculture's grasshopper campaign in the Peace and has been made acquainted with this case. The poison is preferably a 1 per cent solution of calcium chloride, lime water.

### The Ear-Twisting Worked

"You were wondering whether the publishing of Timely Hints was worth the effort and if appreciated. I always read your column first and then turn back to the murders, floods, war news, local news and arrivals of celebrities and less news last. We are clipping these hints and making a file of them for future reference and wish we had commenced doing so before, as we have mislaid many valuable suggestions. Like most good things, guess these hints are taken too much as a matter of course.

We tried ear-twisting on cows kicking while milking and it surely worked. We had one heifer that had to be tied with a rope and another that was very bad, and they were both cured with a very few applications. — A.H.C., Dawson Creek, B.C.

## With the Boy Scouts

The Scouts' Welcome To Their Majesties

The Boy Scouts of Canada are all ready, packed boots to newly posted neckerchiefs and re-stiffened bathrins to pay their loyal tribute and enthusiastic part during the visit of Their Majesties. At the various stopping places of the royal tour they have been assigned sections of parade routes to lead, always with police, soldiers and veterans. In the larger centres they have ready fully qualified mobile or fixed first aid units, or trained "ambulance" men. Scouts to assist the Red Cross and St. John Ambulance Association. As one of their established forms of service, they will look for and take care of lost children at their lost-children stations. Guards of honor units of King's Scouts have been assigned for corner stone layings and unveilings and messengers and ushers have been designated for numerous special functions and ceremonies. At Winnipeg and Regina excursion trainloads of rural school children will be met by them upon arrival, and also looked after throughout their stay. On incoming highways they are organized to assist in operating information booths for the benefit of incoming motorists.

### All Religions Meet in Scouting

All Christian religions, and all the people who look to a Divine Creator for guidance and support, can meet in perfect harmony under the banner of the Boy Scout Movement, which embraces them all.—Sir George McLaren Brown.

### Bishop of Ipswich On Scouting

"If the world is to be what we would like it to be there is no force more likely to help than goodwill between the younger people of the different nations. There are a few movements for which I have greater respect or which I believe in more than the Scout and Guide movements." — Lord Bishop of Ipswich.

**White Walking Sticks For The Blind**  
As a good turn for blind persons the Boy Scouts of Southall and Hayes, England, appealed to the public for walking sticks, and secured over 80. The sticks were painted white and fitted with new handles. After the needs of the local Blind Club had been supplied, 40 were sent to the London Association for the Blind.

**Staffordshire's International Camp**  
The Boy Scouts of Staffordshire have invited Scouts from all the European Scouting countries to send a scout patrol to camp with them this summer at Beaudesert Park, the camp site given them by the Marquis of Anglesey in memory of King George V. It is planned to accommodate the ex-

pected 200 visiting boys in the homes of English scouts for two nights of their stay, to give them an idea of English home life.

**Rover Scouts' Help For Idle Miners**  
An occupational centre and sports ground developed by unemployed miners among the slag heaps and silent shafts of the coal mining district of Tow Law, Durham, was made possible by the interest and financial support of London Rover Scouts, who provide \$75 a month, through small individual contributions. Tons of slag had to be shifted by the workless miners and the building of the centre is said to be one of the most ambitious and successful projects of the kind in the country. The Rover Scouts of Bileby, Yorks, have adopted the village of Shildon on somewhat similar lines.

## CORNWALL NEWS

CORNWALL, May 25. — Mrs. A. Woodward returned home on Tuesday after a week's visit with her daughter, Eileen, in Grande Prairie.

Even Fisher has returned home for the summer. At present he is busily fencing the crop.

Mr. and Mrs. Edgar Weber, Irene and Cecil were Sunday dinner guests of Mr. and Mrs. A. Chambers.

The softball team has been revived and had a few practices. We are looking forward to a game with Crooked Creek in the near future.

## AERONAUTICAL TIT-BITS

By J. W. Neil

### EXPERIENCE OF ICING

Mr. W. Leigh-Brintnell is the president of the second most northerly air line in the world, Mackenzie Air Service Limited of Canada fly to Herschel Island, in latitude 70°, at nearly all seasons of the year.

There are other reasons why Mr. Brintnell, who happens to be in Britain just now, was chosen as a person to consult on ice formation, particularly carburetor ice. Since flying in the R.F.C. and R.A.F. he has been pioneering commercial flying in Canada. He was one of the first in the game, in 1927, when pilots flew into the Arctic with machines designed for temperate climates and found out how to make them work.

Since forming his own air transport company he has continued his practical research and solved the special problems of Arctic flying with a peculiar blend of scientific insight and practical common sense.

Some of the statements he has made throw a light on the ice formation business which will be new to many.

He started by pointing out that a carburetor is a very faithful process of a refrigeration plant. Cold weather is not necessary to ice formation at the butterfly valve and much more depends on the humidity of the air.

We ourselves found this out by tracing to an iced-up carburetor the bad running of a motor near the Mediterranean, by no means a cold place. There is a certain considerable icing which is never recognized as such because its effects are relatively slight. Mr. Brintnell makes the rather startling statement that he had known icing to occur in a carburetor to which air was going in at 80° Fah. This was not in the winter but on a rather mild day. He thought such a thing unlikely in winter because the air could not hold much invisible moisture then.

Some operators of regular air lines may be surprised to learn that Mackenzie Air Service machines, on what might be classed as "bush operations," all have air intake thermometers, cylinder head temperature gauges and Cambridge exhaust gas analyzers. Mr. Brintnell says that he cannot imagine a serious operator trying to do without instruments which are necessary to fight ice and to take proper care of the motors.

The modern aero-motor is a very hard-worked mechanism, and it is to last it cannot be taken apart outside and left to take its chance. Every possible variable factor must be under control.

There are two methods of heating the intake air. One is by taking air from a muff round the exhaust tail pipe. The standard method on the Wright Cyclone motors is a pair of tubes inside the exhaust collector ring, passing from the bottom to the top, and there delivering the hot air to the intake or merely exhausting it, according to the position of a flapper valve. Air enters the scoop at the bottom and passes through the flapper at all times, thus cooling the exhaust pipes and preventing them from burning out, also cooling the exhaust gases, and consequently the manifold, and cylinder heads. When needed to heat the carburetor the valve is turned accordingly, and in hot weather the cooling effect on the heads is still very useful.

The maximum heating available from this device is enough to force the intake air up to 160° Fah. in weather of 40° below zero. It is never needed to that extent, but there is enough margin for extreme cases.

The accurate use of the heater is nearly as important as having it at all. When air is heated at the intake there is a drop in power, usually about one inch of manifold pressure, but sometimes much more (readings are all absolute in inches of mercury) because hot air weighs less than cold, and so the weight of charge in the cylinder is reduced.

For cruising this can be got back by opening the throttle, but for take-off it is dead loss, so excessive heating is to be avoided. Mr. Brintnell insists on the necessity of taking in the air for heating where there is a ram effect, thereby losing as little power as possible. We notice that the Wright Cyclones of certain aeroplanes do not have the tubes open out of the exhaust collector ring at the bottom and do not even face forward.

One of the Mackenzie Air Service machines has a Chandler Groves carburetor. Mr. Brintnell says that it has many advantages but does not dispense with the necessity for air heating. In ice weather it will not work without warmed air.

The company operates in weather as cold as 72° Fah. below zero, and at or near that temperature fog is sometimes met. It is usually in small patches and easily avoided, but the very existence of water in liquid form more than 100° below freezing point is surprising. If an aeroplane flies in or through such fog the ice which forms is so fixed onto the structure that Mr. Brintnell does not think any de-icer would dislodge it.

Structure icing—this is on wings, tail unit, struts, etc.—seems to be of a problem than in the carburetor. Fog and cloud in winter are local, and presumably the worst times for wing-ice are at freeze-up and break-up. These periods, between float and sink operation, put a stop to flying, anyway for the present, till runways become more common.

Among other special devices for winter operation peculiar to this company is the special oil tank which does away with the need for draining the oil at every stop and heating it before replacement. The oil tank has a sort of tubular boiler built in, and the oil can be heated with the same blow torch and at the same time as the motor. The time saved is considerable—Excerpt from the Aeroplane.

### CANADIAN AEROPLANE INDUSTRY

Canadian aeroplane industry has not made the strides that the aeroplane industry has in the United States because it is cheaper to import planes from the United States. What companies are operating in Canada have had to build up a business. Only the possibility of military orders has brought in finance into the aeroplane industry in recent years. Commercial operators with 512 planes in service at September 30, 1938, latest figures, have bought some of their planes in Canada, have flown them

across the international border from United States plants. The last year for which official figures are available, 1937, the Dominion Bureau of Statistics reports 110 planes produced in Canada at a value of \$1,461,626; whereas Canada imported the same year aeroplanes valued at \$1,358,621, without engines, and engines and complete parts valued at \$1,032,644.

While the first plane flown in the British Empire was piloted by J. A. McCurdy at Bellefleur, Nova Scotia, on February 23, 1909, no more aeroplanes than those constructed by Dr. Graham Bell's young men were built in Canada till the necessity of the World War brought McCurdy to Toronto to build a factory to turn out planes for the British government in 1916. This was succeeded later in 1918 by Canadian Aeroplanes Ltd., the Imperial Munitions Board's own aeroplane manufacturing plant at Toronto. In twenty months this plant turned out 2,900 J.N.4 and Avro bi-seaters. In 1918 the United States gave the plant an order for thirty F.5 flying boats. Engines for all these planes came from Britain.

From the end of the World War till 1923 there was little done except servicing on Canadian war-time aeroplanes. That year Canadian Vickers received its first government order for eight single-engine amphibians for the Royal Canadian Air Force. Then came a search for Canadian aeroplane especially suited to Canada's lake-studded northland, resulting in Vickers' three-place Vedette flying boat. By 1924 a number of other companies had started up, but Vickers still built practically all the Canadian aeroplanes, and that year started on Fairchild.

De Havilland established a branch plant in Canada at Toronto that year, and Wright engines were then assembled and serviced from a plant at Montreal.

In 1929, at the head of the pre-depression aviation boom, Curtiss, Consolidated, Bellanca and Boeing entered the Canadian field, while Vickers received a Fokker manufacturing license.

Canada's Empire tariff preferences brought some of these and other aircraft industries to the Dominion, primarily for export purposes. With the 1929 crash and the drop in aviation interest, followed by a government economy campaign on the Air Mail and Royal Canadian Air Force development, the industry came practically to a standstill in Canada. Only in the past three years has the industry taken a new lease on life, as the result of the government decision to start overhauling defenses.

### CANADIAN VETERAN

Captain W. P. Grant, 78 years of age, is perhaps the oldest veteran of the Great War to participate in the Royal Visit to the Canadian Capital. Captain Grant is seen above in the special beret he wore during the visit. He enlisted at Halifax with the 237th Battalion when he was 24 years of age, and was quartermaster of the regiment.

### COURT RECOGNIZES HONEST MAN'S CLAIM TO BREAK WILL

GODERICH, Ont., June 1.—James Dunbar of Huron County is a poor man and with a minimum of education. Yet he is possessed of an advantage that money cannot buy nor education acquire. He is honest.

This characteristic stood Mr. Dunbar in good stead in a Goderich court when he attempted to break his uncle's will. The story briefly is that in 1913, the uncle made a will bequeathing his farm to another nephew. Then, 23 years ago, Mr. Dunbar went to live with his uncle on the promise that the farm would come to him. He took with him his life's savings, \$1,200, worked without pay since then, and spent his savings. The uncle evidently intended to make over the will, but failed to do so.

Breaking a will is no easy thing to do. But Mr. Dunbar did it. How? By convincing Mr. Justice Godfrey of his absolute honesty; that the uncle had intended changing the will. Furthermore, he had 24 neighbors to testify to his honesty.

Mr. Justice Godfrey said he had never been more impressed by any man than by this 67-year-old weather-beaten farmer, dressed in a 34-year-old suit, and without money or education. It is a high tribute. From the Windsor Star.

Rev. P. E. Schroeder will be away from Grande Prairie until some time in the fall, probably the first part of October.

### Public Notice

By the Board of Trustees of the Grande Prairie S. D. No. 2357 of the Province of Alberta, WILKINS is deemed expedient by the Board of Trustees of the Grande Prairie S. D. No. 2357 of the Province of Alberta, that the sum of Six Thousand Dollars should be borrowed on the security of the said District by the issue of Debentures payable in ten equal consecutive annual instalments with interest at the rate of not more than Five per centum per annum for the following purposes:

For the purpose of installing Water and Sewer facilities in the Grande Prairie Public and High Schools.

THEREFORE notice is hereby given by the Board of the said District that unless a poll of the proprietary electors of the said District for and against the said debenture loan is demanded as provided by The School Act, the said Board will apply to the Board of Public Utility Commissioners for authority to borrow the said sum by debentures.

Of which all persons interested are hereby notified, and they are required to govern themselves accordingly.

D. W. PATTERSON, Chairman  
DATED at Grande Prairie, Alberta, this 13th day of May, 1939.

INSTRUCTIONS TO PROPRIETARY ELECTORS  
A poll may be demanded by any four proprietary electors of a rural school district, by any ten such electors of a city school district, or by twenty such electors of a town, consolidated or rural high school district, but no poll may be demanded when the loan is for the purpose of building a first school house and does not exceed—

(a) in any district other than a consolidated district, \$2,000.  
(b) in a consolidated district, \$5,000.

Every demand for a poll should be delivered to the Secretary of the district, or in his absence, to the Chairman of the Board of Trustees, within fifteen days from the date of posting of these notices. A certified copy of the demand should be forwarded to the Board of Public Utility Commissioners of Alberta at Edmonton.

Proprietary Elector means any elector, other than a tenant, who is liable to assessment and taxation for school purposes in respect of any property situated in a school district.

## CBC Policies and Finances Are Sound, Committee Finds

Declares Networks Should Not Be Sold For Discussion Of Current Affairs, Nor For Political Speeches During Election Campaigns.

OTTAWA, May 20.—No network time should be sold for broadcasting opinion on current affairs, nor should political network broadcasts in federal or provincial election campaigns be on other than an exclusively sustaining basis.

These are two of the important recommendations made by the select committee appointed to consider the annual report of the Canadian Broadcasting Corporation and to review its policies and aims, in its report tabled in the House of Commons recently.

Other recommendations of the committee, which during many sittings delved into the regulations, revenues, expenditures and developments of the CBC, covered the matter of revision of license fees for privately owned stations and short-wave broadcasting.

Financial policies of the Corporation were found to be sound. "The Corporation has consistently achieved a prudent surplus," said the report. "Your committee believes that increased revenue should result from improved coverage and service."

Vendors of receiving sets will in the future be required to report monthly to the Department of Transport the names and addresses of all purchasers of sets, including the date of each sale, if the covering recommendation of the parliamentary committee is adopted. It would increase the burden of dealing in this other way. The committee expressed the belief that the existing regulation, which imposes on the vendor of a radio set the obligation, before making a sale, to furnish the purchaser with a license, should be rescinded.

The increasing scope and importance to Canada of the Corporation's work was commented upon. "The committee feels," said the report, "that more effective steps should be taken through broadcasting itself and other appropriate methods of disseminating information, to familiarize the public with its varied activities."

The report, submitted over the signature of A. J. Beaudin, M.P., chairman, ended with a note of commendation. "Your committee," it said, wishes to record its warm appreciation of the public-spirited manner in which the Board of Governors and the management are discharging their duties as trustees of the national interests in broadcasting. The corporation is developing a sound and progressive method of service to the people of Canada."

The development of the plan of national coverage, especially in the Prairie and Maritime Provinces, where 50,000 short-wave transmitters are being added to the National Network, was noted with satisfaction. In the further development of the plan, the committee approved the Corporation's determination to proceed at an early date with much-needed improvements in coverage and service in south-western Ontario and British Columbia.

"In regard to programs," said the report, "Canada is in the happy position of having at her disposal a wide variety of material, both from inside and outside the country. The Corporation's policy and practice appear to take advantage of this situation, while giving the maximum encouragement to Canadian talent. The plans for the King's visit are noted with approval."

The committee especially endorsed the Corporation's proposals for a larger number of programs for rural listeners. It was felt that broadcasting can be an important agency of practical service to farmers, fishermen and other primary producers, and of bringing the riches of music, drama and other forms of entertainment and culture into their homes. It was felt that the CBC can do much to instill an appreciation of the values and advantages of the rural way of life.

Recognizing the necessity of planning and balance in public service broadcasting, the committee noted with approval the Corporation's determination that the present ratio of commercial to sustaining network programs should not be increased.

With regard to short-wave broadcasting the report said: "The committee of last year emphasized the importance of establishing, at as early a date as possible, a high-power short-wave broadcasting station, financed as a national undertaking but operated and controlled by the Corporation as an integral part of its system. Such a project would facilitate the exchange of programs with other countries, would serve to advertise and interpret Canada abroad, and supplement the domestic program service."

"Canada is the only leading trading nation without such facilities. We desire to draw the attention of the government to the imminent possibility that further delay in proceeding with the undertaking may result in Canada losing altogether the short-wave channels registered in her name, and as a consequence, being shut out of the field entirely."

"Your committee approves, as in the widest interests of the nation, the Corporation's policies regarding short-wave, television and facsimile broadcasting. The Corporation hopes shortly to occupy the field of high-power short-wave transmission. As regards television and facsimile, the policy is to alienate no part of the public domain to private interests. The Corporation intends, as soon as possible, to undertake experiments in facsimile broadcasting."

The report expressed the committee's gratification at a better understanding between private stations and the Corporation, recently attained. In this connection it was pointed out: "Your committee recognizes that the responsibility of controlling and coordinating all broadcasting in the public interest rests upon the Corporation."

Referring to "freedom of speech," the report stated: "Your committee is seized of the difficulties of working out the principles of freedom of speech in relation to the peculiar characteristics inherent in the medium of broadcasting. In view of the limitations, both of time and of the number of channels available for broadcasting, as well as the exigencies of program planning, your committee is convinced that fairness in the presentation of controversial material can best be assured by means of a system of network broadcasting on a sustaining basis."

"Your committee shares the view of the Corporation that network broadcasting of programs of opinion on current affairs should not be available for commercial sponsorship, more adequate time to be provided free for this purpose. The committee believes that the Corporation's policies respecting broadcasts of opinion are designed to ensure the largest possible measure of fairness and equality of opportunity. We wish to emphasize the importance of placing before listeners the widest variety of points of view. It is desirable that such policies be known fully and widely in the future, pointing out: 'While recognizing the rapidly changing and developing character of the enterprise, the committee further recommends that the Corporation's policy decisions of this kind.'

On the matter of political network broadcasting, the report expressed the opinion of the committee that serious consideration be given to placing such broadcasting, during federal and provincial election campaigns, on a sustaining basis exclusively, with the understanding that the time so provided will be divided equitably among the political parties. Said the report: "Your committee is also of the opinion that network party political broadcasting between elections should remain open to purchase, subject always to consideration of fair distribution and program planning."

In recommending that the license fee for privately-owned broadcasting stations be revised in relation to power and population served, the committee recommended that the new scale be effective for the current fiscal year.

Arthur J. Cody, 69, fourth cousin of the late Col. William (Buffalo Bill) Cody, plainsman and showman, died at his home in London, Ontario, from a heart attack.

The birthplace of Shakespeare will be the scene in July, 1940, of an international aeronautical conference under the auspices of the Royal Aeronautical Society.

After a half century of waiting, J. H. W. Kemmis, Edmonton, has received a Riel Rebellion medal from Ottawa. He served with the Moose Mountain Scouts.

James E. Hardy, 64, once one of the world's greatest aerialists and noted particularly for crossing Niagara Falls on a tight wire in 1890, died recently in Toronto.

Rejecting suggestions for drastic economy measures, Prime Minister Michael Savage declared that reduced wages would destroy Britain's market in New Zealand and that would destroy New Zealand's market in Britain.

# Beaver Lodge School Paper

## EDITORIAL

Terese Bowtell.

Hi! Here we are again, back to try to obtain our goal of making our paper still more interesting to our readers. We are sending out only one more paper.

I wonder how many of you will see the King and Queen in Edmonton this week? I hope that all our readers and others will have this chance, as it is something we should all see and remember.

## SPORTS NEWS

Geordie Bond.

The Beaver Lodge sports went over well. The winners of the different events were: Senior baseball, Spirit River; Junior baseball, Hythe. Beaver Lodge and Grande Prairie combined defeated Spirit River in basketball. The Grande Prairie girls won the softball.

Hythe sports are being held Wednesday, May 31.

There was a track meet on Saturday, May 27, at Grande Prairie. Winners from Beaver Lodge were: Maxine Adams, who won two first prizes, one in running and one in standing broad jump. Bill Murray won two firsts, one in the 100-yard dash and one in vaulting. Jimmie Andrews won first in hop, step and jump.

## CURRENT EVENTS

Olga Dron.

Verne Johnston, a resident of Beaver Lodge, was badly hurt when disking with eight horses last Friday afternoon. His arm was broken and his head was cut in several places. He is now at the Grande Prairie Municipal hospital. We hope he will have a speedy recovery.

The group of people that started for the Monksman Pass are detained on this side of the Murray River, due to the depth and swiftness of the water.

Don Little, the son of Mr. and Mrs. Little of Beaver Lodge, has just come home from University at Saskatoon. He had been away almost eight months.

The Junior and Senior C.G.I.T. groups are sending out seven girls to see the King and Queen.

## SEEN AND HEARD

"Harold making fun of the a—a teacher."

"Eldy and Calvin both ardent poem writers. I wonder if they ever get together on the subject."

"Lorry stamping his name all over the back of his hand so everybody will remember who he is."

"Mr. Eggenberger yawning and the hygiene class wanting to tell him that he should get eight hours of sleep."

"Jeanette poking Bruce with a compass (in the back) and Bruce seems quite amused at the consequences."

"Calvin practising 'Madame Butterfly'—or is it just a yawn?"

## JOKES

Everett Snider.

Mr. Eggenberger: "What is the difference between a stoic and a cynic?"

Calvin Lee: "A stoic is a bold that carries babies and a cynic is where you wash dishes."

## LIMERICKS

Pat Carroll.

There once was a lady in Europe  
Who went for a slide in some syrup.  
She fell on her back  
With a terrible smack,  
The poor young lady from Europe.  
May McDonald, age 12.

There was an old man of Peru  
Who started to look for his shoe.  
He looked around him was a  
But fell on the ground,  
The poor old man of Peru.

There was a young man of Bengal  
Who went to dance in the hall,  
He danced so fast  
He died at last,  
The poor young man of Bengal.

## WANHAM NEWS

# C. G. I. T. Puts On First Mother And Daughter Banquet

WANHAM, May 29.—The first C.G.I.T. Mother and Daughter banquet to be held in Wolfram was a success. The theme was "Patriotism," in honor of the visit of the King and Queen to Canada. Tables were beautifully decorated in red, white and blue. The place cards and serviettes bore flags and each guest was presented with a tiny silk flag. Plants and tall red and blue candles graced each of the three tables placed in a U-shape.

The banquet over, a short program took place, with Vera Laughey presiding in the chair. "O Canada!" was sung to open the program. An address of welcome and an outline of the C.G.I.T. program was given by Vera Laughey. The girls then rose and sang the C.G.I.T. hymn and repeated the Purpose. Kathleen Cameron and Ethel Metz gave toasts to the King and Queen. Mrs. Metz gave a toast to the Mothers and Mrs. Trump replied with a toast to the daughters. Several numbers were presented by the girls and a sing-song was enjoyed by all.

The evening concluded by singing "God Save the King" and "Taps."

Those present were: Betty Trump, Mrs. Trump, Jean Harrington, Mrs. E. J. Harrington, Doris Blonski, Mrs. Blonski, Ethel Metz, Mrs. Metz, Kazimira Jacobowski, Mrs. Jacobowski, Mrs. L. Fowler, Norma MacDonald, Mary Bryndzak, Mrs. Bryndzak, Leola Fowler, Mrs. F. Fowler, Esther Kandt, Miss N. Horne, Kathleen Cameron, Mrs. Cameron, Leader Montheleone Cameron, Mrs. Ramsfield, Margaret MacDonald, Mrs. Pickard, Ethel MacDonald, Mrs. Sandbrook, Clara Hauser, Mrs. Hauser, Frieda Kandt, Mrs. J. Kandt, Claudia Wegh, Mrs. L. Kandt, Rosella Wiegell, Mrs. Wiegell, Staffy Chernawski, Mrs. Hill, Leader Muriel Grant, Mrs. Jacobson.

## Why?

"Don't you deplore people who reply to one question by asking another?"

"What sort of question, for instance?"

## POEMS

Sylvia Loven.

Speak gently, my teacher, speak gently, I pray;  
Speak gently and I'll read my lesson today.  
The school is asleep by thy murmuring talk—  
Speak gently, my teacher, and softly walk.

Thy loud heavy voice resounds through the room;  
Seems to bring your pupils into the gloom.  
Thou blond-headed pedagogue, thy lectures forbear—  
Disturb not the room which is slumbering fair.

## There's a Breathless Hush in the School Today

Eldy Dron, age 13.

Fifty to make and a class to pass,  
There is no time for hockey or play,  
Everyone busy from lad to lass.

An hour to work and everyone here  
And no one talks as the hour draws near,  
And the teacher's voice rings loud and clear—  
Quiet, all quiet! And the hour draws near.

Eldy Dron, age 13.

## My Sleeping Song

Someone came knocking  
At my middle-sized desk;  
Someone came knocking,  
I guess, I guess, I guess.

I listened, I lifted,  
I looked to left and right,  
But nought there was stirring  
In the school-room gay and bright.

Only the busy teacher  
Whirled on the board;  
Only the other classmates  
With young Georgie as their lord.

Only the rulers clapping  
While the pen nibs scratch;  
So I shouldn't count chickens  
Before they start to hatch.

Calvin Lee, age 12.

## An Arithmetic Lament

Who likes arithmetic?  
Gives you a pain in the neck,  
Specially finding principal  
When it's far from sensible.  
Who likes arithmetic?  
Jean McDonald, age 12.

## The Clouds

All the clouds go drifting by,  
Floating softly through the sky;  
Bringing rain and also snow,  
Helping little plants to grow.  
Often I have stopped to wonder  
How they flash and roar and thunder.  
If you look up into the blue  
I think you'll find some clouds there too.  
Clouds are helpful to mankind,  
For many uses they do find.  
Laurie Little.

## GORDONDALE

### REAL SOAKER POURS DOWN

GORDONDALE, May 24.—Preceded by a two-hour rain during the early part of the week, a real soaker commenced during the night of the 23rd and continued until the small hours of the night of the 24th, raising Henderson Creek to a higher level than it reached during the spring run-off from the snow.

How many inches of water fell we do not know precisely, but a ten-foot eave's trough caught 45 gallons of water from a 150-square foot roof in 7½ hours. It is the heaviest fall of rain we have had at one time since what we refer to as the year of the flood, when all bridges were washed away in 1935.

The major part of the crops are above ground four or five inches, and it will be no time now before they will fill the rows. Growing conditions are just splendid—the ground wet and warm. Another field or two will be seeded now for green feed, but the crop area is less than last year.

What a blessing this downpour was for fire rangers in particular. It is the first time in two spring seasons that a person can scan the horizon and see home. The financial returns are reversed—losing a dollar today making ten tomorrow. A fire-blackened stump is the end of the usefulness of what was a beautiful tree. The place of giving relief in any form, fireguards were cleared around the remaining blocks and belts of timber, unemployment for the North would be down to the minimum and revenue would be assured for years to come instead of laying plans to plant trees in the years to come. We have a good illustration of what it is costing to try and do that very thing across the line in the United States today.

### CHURCH GIRLS ARRIVE

The Anglican Church girls, Miss A. Kiellar and Miss Dance arrived on Saturday, May 20, with their van and have already become acquainted with Peace River mud, and will make the acquaintance of the mosquito later.

They were in charge of the Sunday school lessons on Monday evening at the school-house, which lessons are taught weekly by local teachers. Several homes with children have been visited by them already and they will visit every such home during their sojourn here.

### DIVINE SERVICES

Divine service was held by the Rev. Mr. McSwain in the school-house on the 26th. His text was: "Fear of God is the beginning of wisdom," and the sermon was very ably delivered.

An announcement of interest to everyone in the district was to the effect that Mr. R. D. A. Currie will be here to take the next service on June 4, at 11 a.m. sharp. Many expected to see him on Sunday last but in that they were disappointed.

The ladies who were intending to take dental treatment in Spirit last Friday were very unfortunate in one respect and may be lucky in another when the automobile in which they were to travel failed to function.

Need has a sore mouth from his contact with the dentist and Cecil, our mail carrier, looks as though he might be contracting the mumps. No other sickness this week, we are glad to report.

One well-known local citizen now abstains from smoking, following the lead of another well-known local citizen who has been an abstinence for two years. When asked if he had also signed the temperance pledge, both answered the same: "There is nothing wrong with my mentality—yet. This is will-power." Both being six feet better, makes us wonder if a new lodge order, group, etc., is about to be formed, with no runs like the scribe eligible.

## SPIRIT RIVER NEWS

### ANOTHER LITTLE RAIN DIDN'T DO US ANY HARM

SPIRIT RIVER, May 29.—The weather man still smiles on us. Sunday another nice little rain fell to the amount of .10—just enough to freshen things up and make the growing grain smile, which is making rapid progress.

As we are hard at work in some fields. Reports have come in from districts where the worms are a little more hungry than in others, the crop being cut fifty per cent in some fields. Well the supply and demand balance has to be regulated somehow.

### WENT TO PEACE RIVER TO ATTEND SERVICE

Steve Keay and Jimmie Dodge and families motored to Peace River Sunday to attend A.F. & A.M. divine service in the hall. They reported a wonderful trip—skidding all over the highway and digging mud out of the wheels, all of which adds pleasure to motoring. They arrived in Peace River in the time to turn round and return home. The weather man had held them up long enough to miss divine service and the blessing of the Bishop—all of which, as we are hard at work, they then supposed to go from here, but being late starters the storm could not wait on them. Being rather wise, they stayed put.

### LILAC TIME

It is lilac time at J. K.'s place and the hedge is a mass of bloom—a lovely sight. Some people, however, don't seem to appreciate the beauty of flowers and have a very thoughtlessly destroying property someone else values very much. When walking past this hedge it is not an unusual occurrence for one of these thoughtless ones to yank off a spray and throw it away, without even a sniff of its fragrance.

May we state that this lilac hedge was planted in an attempt to beautify the place and for the pleasure of the tenants and passers-by. It is to see it despoiled by those who do not love flowers and the many other things of beauty put on this earth for us to enjoy. They are asked to please refrain from further destruction. Anyone who cares for a spray or a bunch of lilac should call in and ask for it. It will be willingly given and cut properly with knife or scissors, and without spoiling the bush. Remember, we want to see our lilac next year, and can't have it if the growth is spoiled by the blooms being torn off. Thanks.

### HOLIDAY SEASON HAS BEGUN

Russ Harrington, who has been out for three weeks, visiting the World's Fair at San Francisco, is expected back soon—and won't Russ have something to tell the boys? Remember the fish story he told last summer after a visit to Kinross. Fairly am sure he will be able to fade that one now.

Alex. Innes and wife left for holidays, going to Manitoba. Alex. has been under the weather a long time and we sincerely trust this little trip will do him a world of good.

### STREETS PAVED WITH SCRIPT

Oh boy, the town fathers are worried now. They started to gravel two blocks of the main street and for the past week one could see teams strung out along the road on their way to work with gravel. The farmers have got the habit now and town officials are wondering just how they can be stopped.

This project shows how anxious many farmers are to pay up their debts when the chance offers. They can't pay with coin, but show them a way to work it out and they will do their stuff. Of course there are some who won't work, won't pay, and don't care whoop. These men of course are marked by the town fathers and it's a long lane that has no turning, which dead beats will find out, but it will then be too late.

The gravel used by the town to be paved is being used by the town to work off their arrears of taxes at \$1.25 per cord. Messrs. Councillors you would have so much gravel a few days it would make your head swim. Just try it on your main roads. It would be cheaper in the end—less maintaining—and give you an all-weather road to and from everywhere. As it is now our roads to and from Rycroft are a disgrace. They surely are a poor advertisement for the district and a good way to keep travellers and tourists out. Surely it is better to improve, be progressive, and have your red put to assets than red on the balance sheets. The taxpayer thinks this is worth consideration. How about it, Mr. Reeve.

### "BUD" STOPS FOR A DRINK

Our genial sports announcer over C.F.G.P. "Bud" Powell, stopped over in town this week—just long enough to say "hello" and have a drink. He didn't say of what. We have heard water here, anyway. "Bud" promises to be with us on sports day, June 7.

### SPORTS DAY, JUNE 7

Sports Day is not very far away now. It is a day to support this year and the next district turn out and make it a real holiday? Remember this is YOUR DAY. The town cannot put on a sports day without the country. WE NEED YOUR CO-OPERATION. If you have any suggestions to make this day a bigger and better one, just call on the committee, and sure they will welcome any advice or suggestion. Remember to get your cars decorated for the big parade.

### YOURS FOR MORE SPIRIT IN SPIRIT.

You saw it first in The Tribune. It was worth seeing.

# WELCOME TO Their Majesties

THEIR MAJESTIES THE KING AND QUEEN ON THE STEPS OF PARLIAMENT BUILDINGS, OTTAWA, ACKNOWLEDGING THE ACCLAIM OF THOUSANDS OF CANADA'S CITIZENS

## God Save The King

God save our gracious King,  
Long live our noble King,  
God save the King:  
Send him victorious,  
Happy and glorious,  
Long to reign over us;  
God save the King.

Thy choicest gifts in store  
On him be pleased to pour;  
Long may he reign:  
May he defend our laws,  
And ever give us cause  
To sing with heart and voice,  
God save the King.

Our loved Dominion bless  
With peace and happiness  
From shore to shore;  
And let our Empire be  
United, loyal, free,  
True to herself and Thee  
For evermore.
